

Cost Information for Budget Planning

Critical Systems can assist you in budgeting your security and safety needs for the future. This checklist can help you select the systems that you require and allocate their costs in your budget.

Intrusion:

Considered as the second line of defense after standard locks and doorways have been breached, these affordable systems are designed to protect office equipment that is not easily replaced or put back in service.

_____ Control Panel (commercial UL listed)	x \$700 = _____
_____ Entry door contact	x \$125 = _____
_____ Window glass break detection (25 ft. coverage area)	x \$150 = _____
_____ Motion detectors (50 ft. coverage pattern)	x \$150 = _____
_____ Arm/disarm keypads	x \$200 = _____

Budget Total: _____

Access Control:

Provides controlled entry through any doorway without the use of conventional keys. Benefits of these systems include adding and deleting users quickly without re-keying the entire facility, reports of user access and activity, time and attendance, and selective access by use group and assigned doors. These systems can also be seamlessly integrated with a security system to eliminate the need for pin codes.

_____ Number of solid wood or steel doors	x \$2200 = _____
_____ Number of single glass doors	x \$2500 = _____
_____ Number of Herculite double glass doors	x \$3000 = _____
_____ Computer (if needed)	x \$ 850 = _____

Budget Total: _____

Video Surveillance:

Records activity at select locations providing liability protection and monitoring of unwelcome visitors. These systems can grant access through electronically-controlled doors. New state-of-the-art digital recorders eliminate the use and changing of VCR tapes and, in most cases, the video can be retrieved from a remote location.

_____ Number of high resolution fixed color cameras	x \$1200 = _____
_____ Number of viewing monitors (not required if digital recorder is connected to network)	x \$600 = _____
_____ Four-camera digital recorder with 80GB hard drive	x \$3000 = _____
_____ Ten-camera digital recorder with 80GB hard drive	x \$3200 = _____
_____ Sixteen-camera digital recorder with 80GB hard drive	x \$4000 = _____

Budget Total: _____

Additional Options:

Computer Room Special Hazard System (survey required to provide pricing)

Pre-Action Sprinkler Systems for protecting valuable assets and data within a specific area without the risk of accidental water damage

FM200 Suppression Systems for protecting valuable assets and data where without the use of water and its associated damage
